SUMMARY

Full Stack Developer with internship experience in **React.js**, **Node.js**, **Flask**, and **MongoDB**, and hands-on **LLM/RAG integration** with three AI-powered tools deployed live. Seeking a Software Engineering role in Bengaluru to contribute across the full stack in a fast-paced team.

EDUCATION

Hindustan College of Science and Technology, Mathura

2022 – 2026

B.Tech, Computer Science and Engineering Minor in Project Management

CGPA: 8.44

Coursework: Data Structures & Algorithms, Object Oriented Programming, Database Management Systems

WORK EXPERIENCE

Webmobi360: B2B AIML Solutions

Sept – Dec 2025

Full Stack Development Intern

Remote

- Designed **JWT-based authentication with RBAC**, securing API endpoints across multiple user tiers in production.
- Built and consumed **RESTful APIs using Node.js/Express** integrated with React frontend for end-to-end feature delivery.
- Participated in sprint cycles and code reviews, shipping production-ready features on schedule.

RCPL

Sept – Nov 2024

Full Stack Developer Trainee

Hindustan College of Science and Technology

- Developed **3 full-stack web applications** using **Node.js** and **MongoDB** with CRUD operations, session-based auth, and scalable backend architecture.
- Implemented **secure auth flows** and reusable service-layer modules, reducing redundant code by ~40%.
- Delivered clean REST API architecture following MVC conventions across all 6 modules.

PROJECTS

Multi-Tenant SaaS Dashboard

[Live Demo](#) | [GitHub](#)

Tech Stack: React.js, Node.js, Express, MongoDB Atlas, JWT, Render (production AWS path also implemented: ECS Fargate, CloudFront, S3, SQS)

- Built a multi-tenant SaaS platform with **JWT** auth and 4-tier **RBAC**, enforcing org-scoped data isolation across 15+ API endpoints.
- Discovered and patched a critical **cross-tenant data leakage** vulnerability through independent security testing.
- Architected production-grade AWS infra (ECS Fargate, CloudFront, S3, SQS) for scalable multi-tenant delivery, alongside a deployed free-tier version on Render.

DocMind — PDF Q&A Bot & Article Summarizer

[Live Demo](#) | [GitHub](#)

Tech Stack: Python, Flask, Groq API (LLaMA 3), PyMuPDF, BeautifulSoup, ReportLab

- Engineered a **multi-file PDF/DOCX Q&A system** using **Groq LLaMA 3** with drag-and-drop upload, smart context extraction, and persistent session history.
- Extended into a research assistant with **URL article summarization** and **PDF export**; deployed on Render with **sub-3s response time**.

QueryAI — AI-Powered SQL Query Generator

[Live Demo](#) | [GitHub](#)

Tech Stack: React, Flask, Python, SQLite, Groq API (LLaMA 3.3 70B), Render

- Built a **natural-language-to-SQL engine** using **LLaMA 3.3 70B via Groq**, extracting schema from user-uploaded SQLite/CSV files and executing live queries.
- Implemented **automatic schema inference** enabling non-technical users to query data without SQL; deployed on **Render** with environment-secured keys and **sub-3s response time**.

SKILLS

Languages: Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3

Backend & APIs: Node.js, Express.js, Flask, REST API Design, JWT Auth, RBAC, LLM API Integration

Databases: MongoDB, MySQL, PostgreSQL, SQLite

AI / ML: LLM Integration, Prompt Engineering, RAG Pipelines, Sentence Transformers, FAISS

Tools & Platforms: Git, GitHub, CI/CD, VS Code, Jupyter Notebook, Google Colab, Render, Postman

Core CS: Data Structures & Algorithms (DSA), OOP, SDLC, REST Design, Debugging & Optimization
